120 Indiana educators receive Lilly Endowment Teacher Creativity Fellowships

Creative teachers tend to be curious people, but curiosity takes time – a commodity rarely available to them. This summer, however, 120 Indiana teachers, principals, guidance counselors and school librarians in K-12 education will take off for exotic climates like Myanmar and the Galapagos and some not so exotic like Ohio and Pennsylvania. They are the recipients of the Lilly Endowment Teacher Creativity Fellowships.

From Antarctica to Zambia, they will satisfy their curiosities about everything from the Roman Empire to yodeling. They will study Brazilian textiles, the missions of California, the science of Ben Franklin, the biological impacts of changing temperatures, the connections between the Delphi in Indiana and the Delphi in Greece, the Black Plague, sea turtles, Guatemalan marimba music, Liberian folktales, the physics of flat-track motorcycle racing, movie makeup, the Olympic Games, horsemanship, extreme weather, the geology of Iceland, Byzantine iconography, and Vincent Van Gogh.

They will get some exercise. On their agendas: climbing Mount Kilimanjaro in Tanzania and Machu Picchu in Peru, running three marathons in three cities, taking a 250-mile bicycle tour from the mountains to the rainforest in Ecuador, competing in master’s-level track and field competitions, experiencing six Great Urban Races, kayaking and camping on the Antarctic Peninsula, biking from Nova Scotia to New York City, and competing in the Lake Placid Ironman event.

(more)
They are going to build things: a writing cottage, acoustic and electric guitars, Craftsmen-style furniture, a riding railroad and a single-passenger canoe. They are going to write: journals, books (including a children’s haiku book), diaries, mysteries, romance novels and documentaries.

They are going to volunteer: at a South African center for homeless teenage girls, at a school that teaches English to Mexican children, at Best Friends Animal Sanctuary in Utah, at the Elephant Nature Foundation in Thailand, at an equine therapy facility in Ohio, and at the Angels Above Foundation in Colorado.

Their curiosity at least partially satisfied, they will return to their classrooms and offices in the fall with energy and a reinvigorated love of teaching. The Teacher Creativity Fellowship Program is not a “professional development” program, but many teachers have returned testifying that they were “very close” to leaving the profession until this renewal experience convinced them otherwise.

“Good teachers are highly motivated, energetic and committed,” said Sara B. Cobb, vice president for education at the Endowment. “For many of them, teaching is not just what they do but who they are. They devote a tremendous amount of personal time and effort to give individual attention to students ‘after hours,’ to direct extracurricular activities, buy supplies with their own money and keep up with the most effective teaching technologies.

“This program allows them the time to explore their own curiosities and dreams, spend time in other parts of the world, enjoy different cultures and just ‘get away.’ We regularly hear that these renewal experiences have helped many Indiana educators regain their enthusiasm for their profession – and that’s a plus for them and their students,” she said.

Including the 2012 class, 2,442 Indiana educators have received grants since the Teacher Creativity Fellowship Program began in 1987. The recipients of these fellowships are selected from a competitive pool of applicants; about 450 applied for the $8,000 awards.
